Art Unit: 1615

DETAILED ACTION

Applicants' amendments, declaration, and remarks, filed 11/3/2006, have been received. Pursuant to amendment, claims 16 and 18 – 29 are pending.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 27 – 29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims recite "The method of claim 20". Claim 20 is directed to a pharmaceutical composition, not a method. Clarification is requested. For purposes of compact prosecution, these claims will be treated as product claims, since they depend on a product claim and recite features of a product, not method steps.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim 16 **remains** rejected under 35 U.S.C. 103(a) as being unpatentable over US 2002/0024908 to Woolfe in view of US 2003/0138486 to Ouadji for reasons of record and those discussed above. In addition, new claims 18 – 29 are now included in this rejection.

With regard to the newly added claims, the limitations of these claims can be found in the Woolfe reference as explained below.

Application/Control Number: 10/789,174

Art Unit: 1615

- Claim 18 "first and second portions separated by a third portion": see example 1, where separate controlled release and immediate release bead are dispersed in diluants (the third portion) before being added to the capsule.

Page 3

- Claims 19 23, 28 and 29: Example 1 teaches ketoprofen coated with methacrylate/methacrylic acid copolymer and misoprostol diluted with HPMC.
- Claims 24 25: Paragraph [0002] teaches use for treating osteoarthritis or rhumitoid arthritis.
- Claim 26: The formulation of Example 1 is a "dual release" formulation, since it has both immediate and sustained release components. The artisan is "allowed" to administer it as often as needed. Instant claim does not require only once a day or twice a day administration; it only requires that the dosage form is "allowing" of this.
- Claim 27: Example 1 teaches vegetable oil, which is a glyceride.

Response to Arguments

Applicants' arguments have been fully considered, but are not persuasive.

Applicants have submitted a declaration in an attempt to show unexpected results when HPMC capsules are used, in order to show non-obviousness of same. The declaration is deficient for two reasons. First, the declaration is not commensurate in scope with the claimed invention. The claimed invention encompasses a variety of prostaglandins, however, the evidence provided relates only to misoprotol. There is no evidence to

Art Unit: 1615

demonstrate that the same or similar results would be obtained with all of the drugs encompassed by instant claims. Second, the declaration does not compare the invention to the closes prior art. The gelatin-capsule formulations described in the declaration are not the same as those of Woolfe. Thus, the declaration does not show that any results that distinguish from the prior art. A proper side-by-side comparison must compare the results of the invention with the closest prior art if it is to distinguish the claims therefrom.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric E. Silverman, PhD whose telephone number is 571 272 5549. The examiner can normally be reached on Monday to Friday 7:30 am to 4:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Woodward can be reached on 571 272 8373. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
